

GAME INSTRUCTIONS

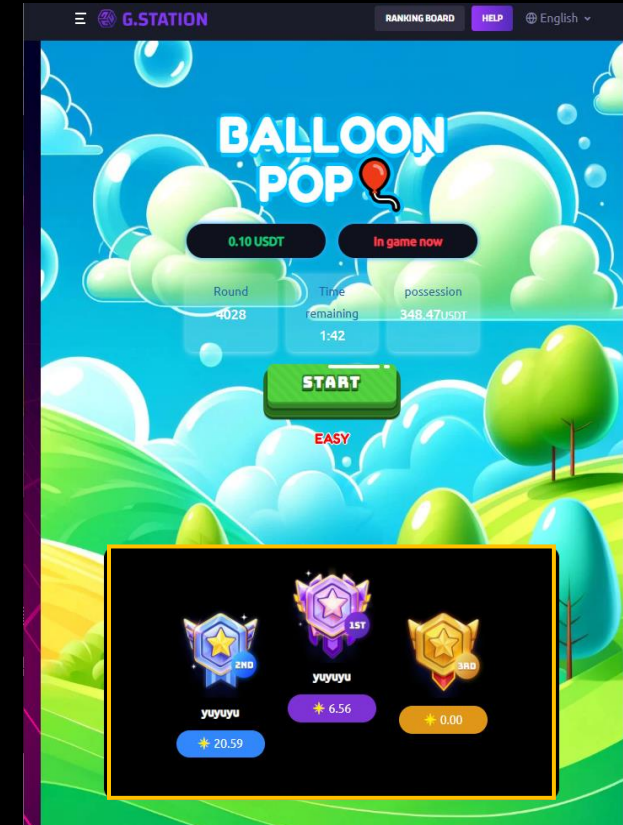

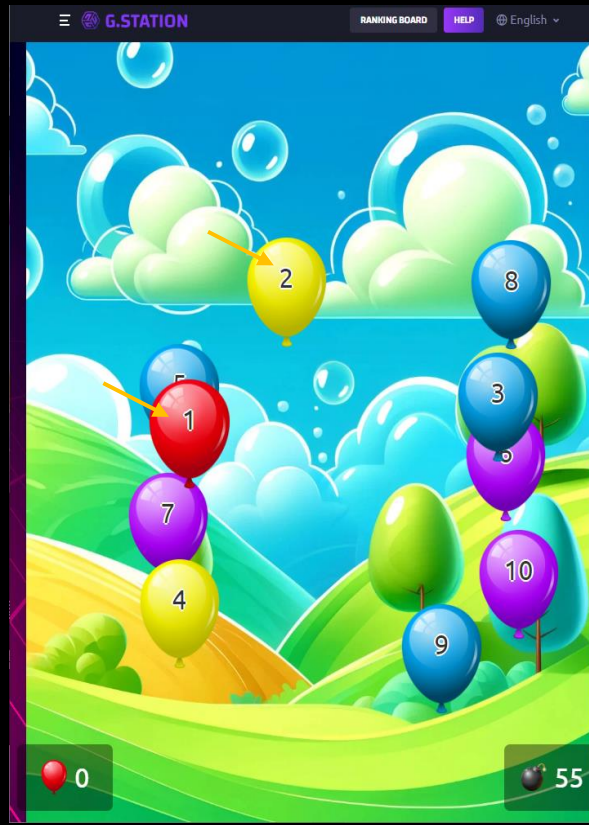

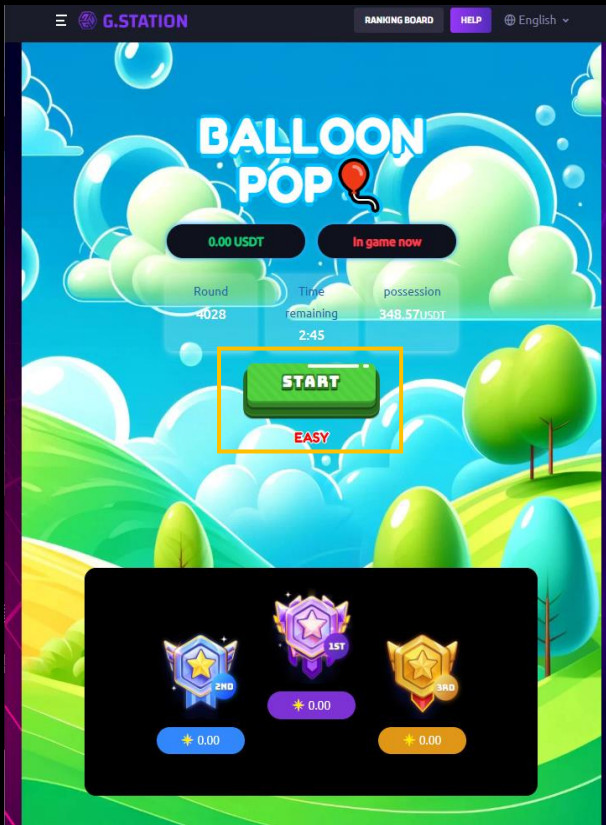

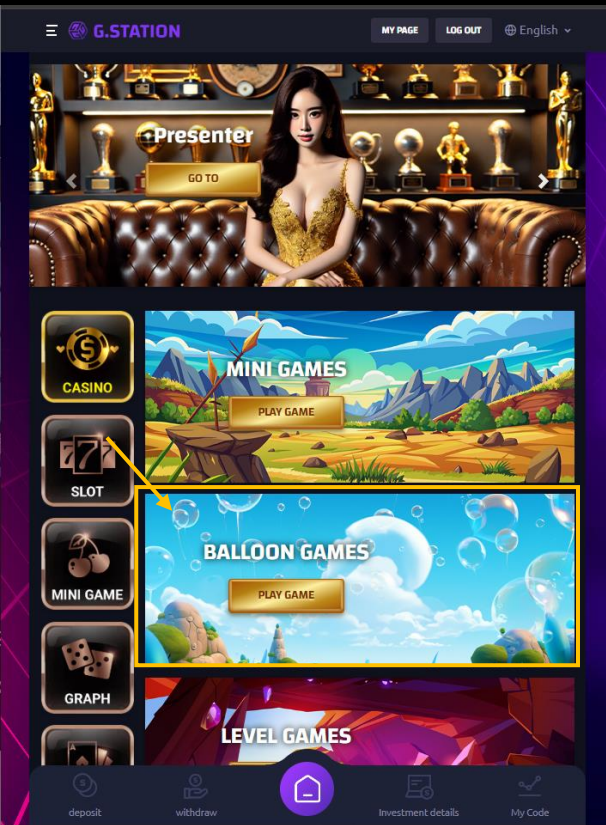

First, select a minigame.
(**MINI GAMES**)

STEP 1: Click “Play Game” and Click “Start”.

STEP 2: This is a game where you have to match two identical pictures among several squares.

STEP 3: The faster you finish, the higher your score. Profits are distributed according to 1st, 2nd, and 3rd place scores.

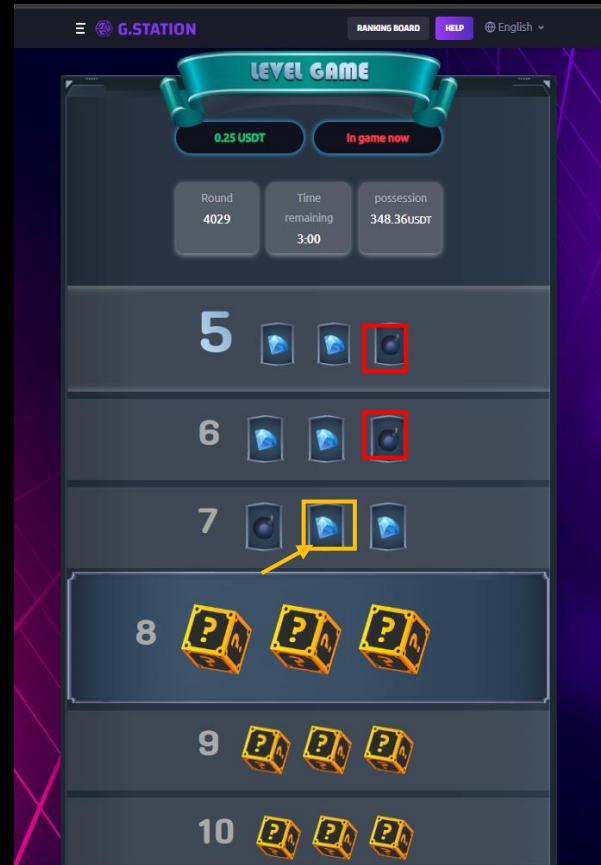

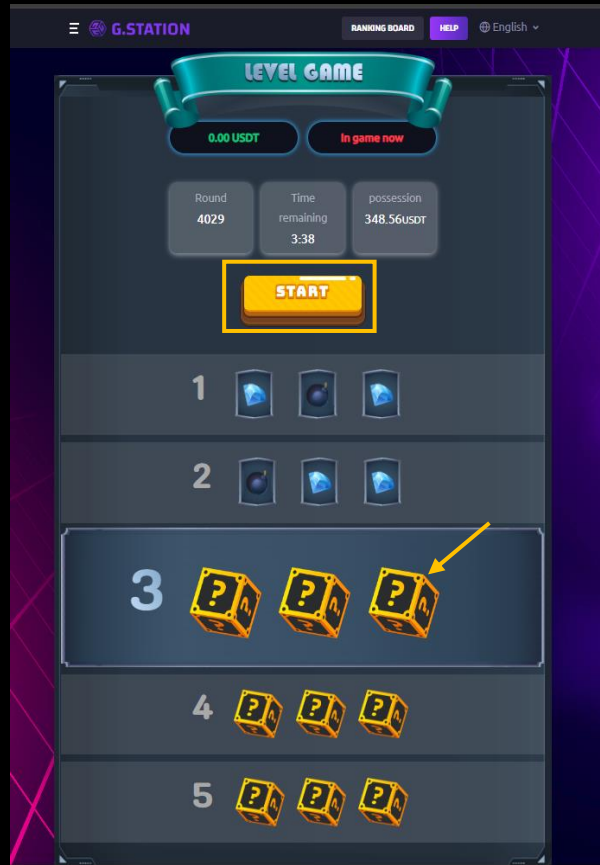

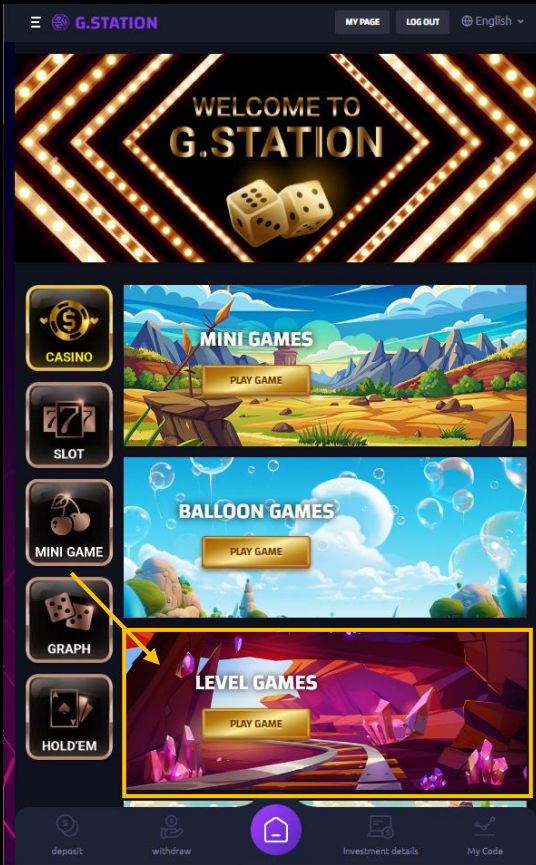

Then, if you choose balloon games.
 (**BALLOON GAMES**)

STEP 1: “PLAY GAME” and Click “start”

STEP 2: Pop the balloons in numerical order on the screen.

STEP 3: The faster you finish, the higher your score. Profits are distributed according to 1st, 2nd, and 3rd place scores.

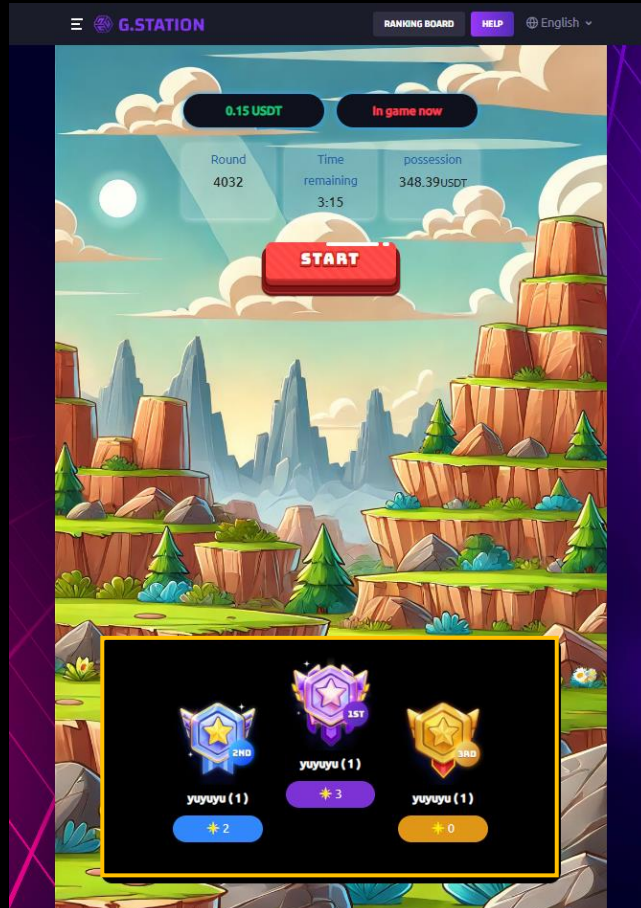

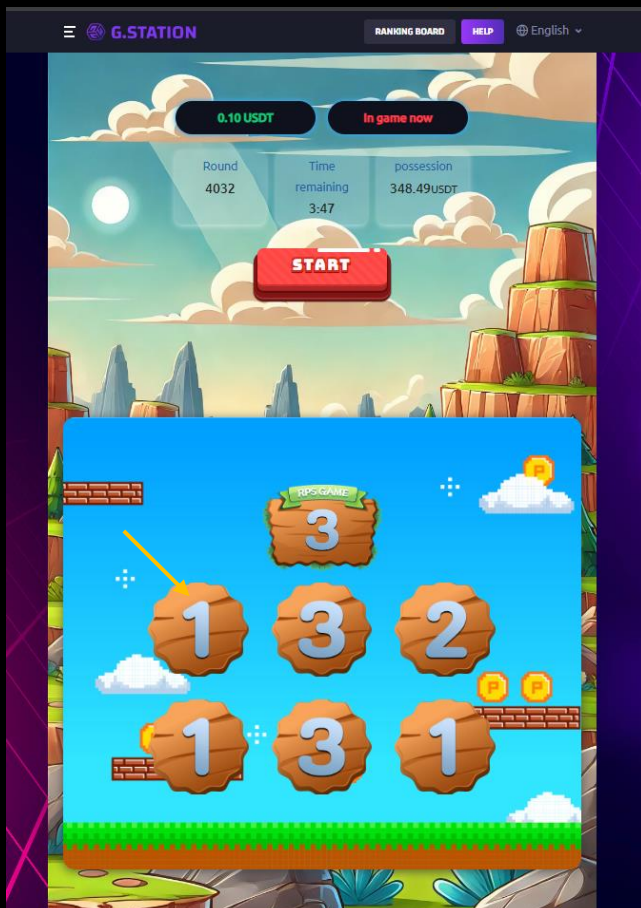

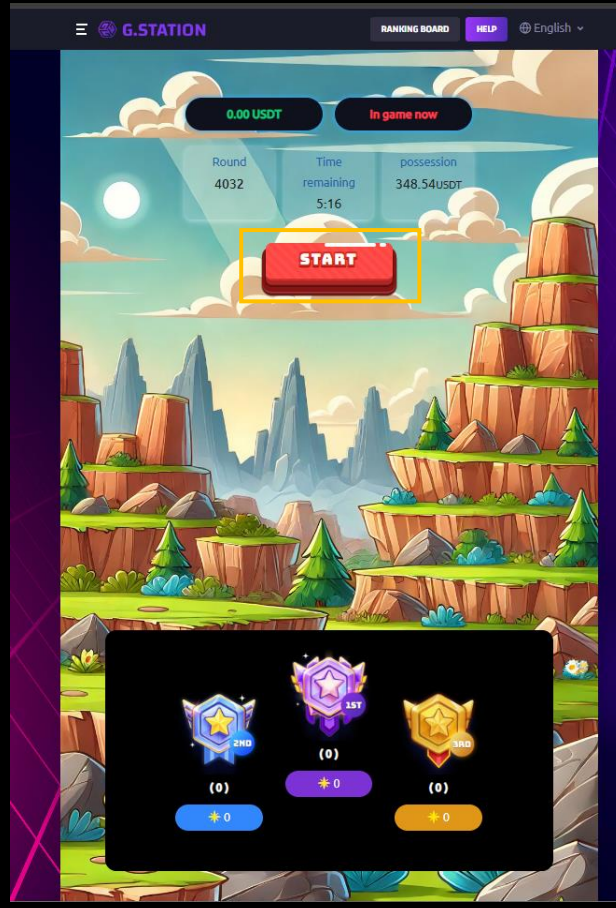

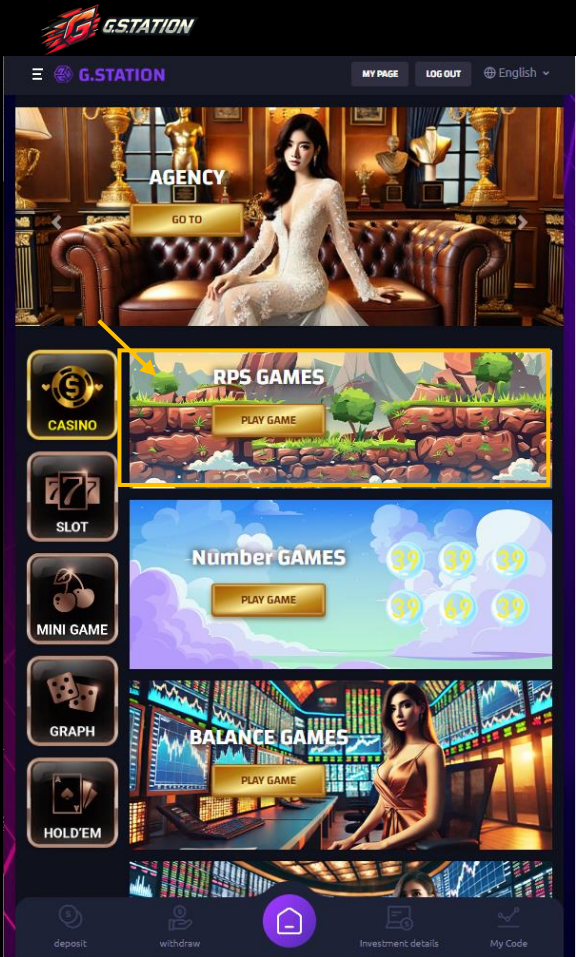

Next when you choose the level game.
(LEVEL GAMES)

STEP 1: “PLAY GAME” and Click “start”

STEP 2: After that, when a question mark box appears, avoid the bombs and select the question mark box.

STEP 3: If you avoid the bombs, you go down to the next level, and the person who goes down more wins. If players are of the same level, the prize money is split in half.

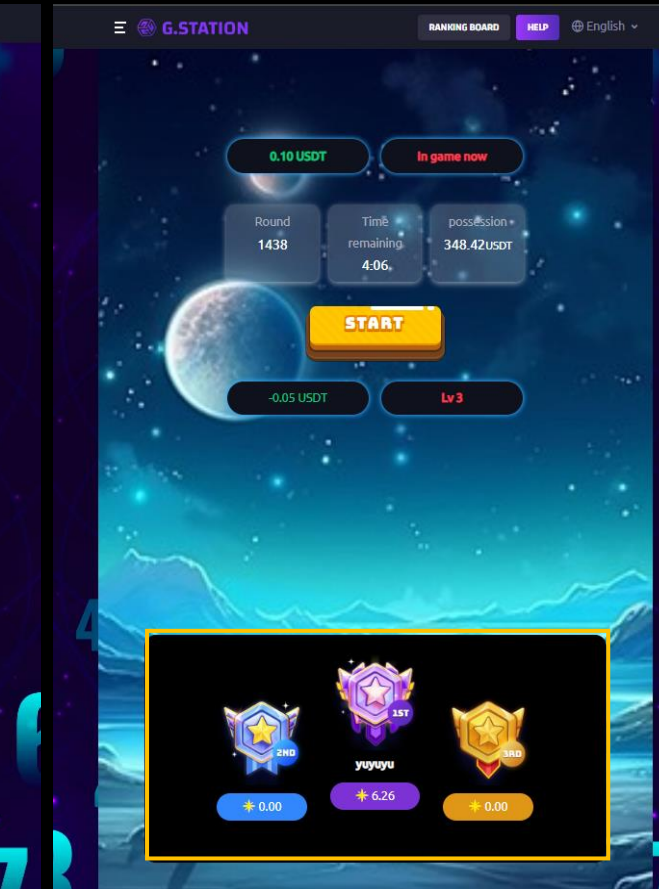

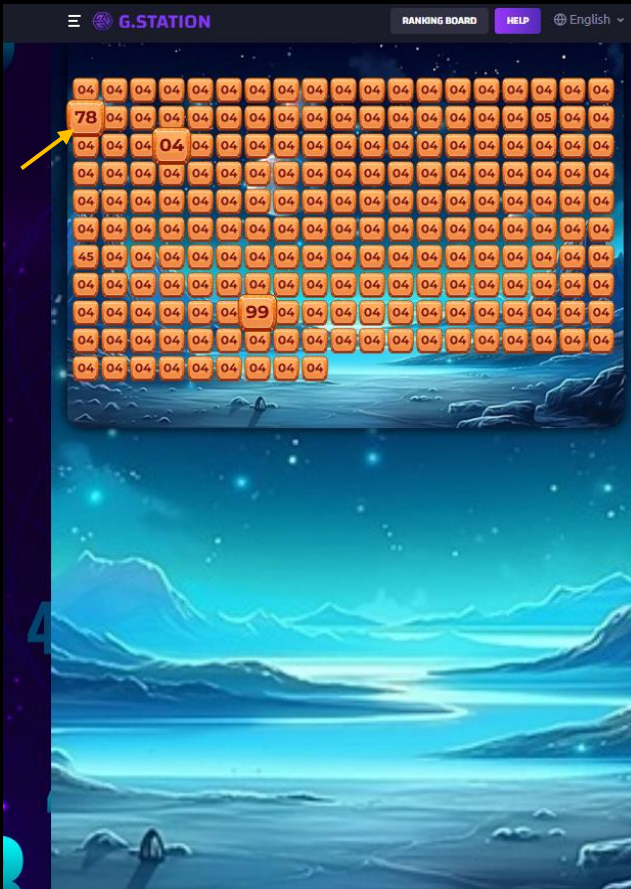

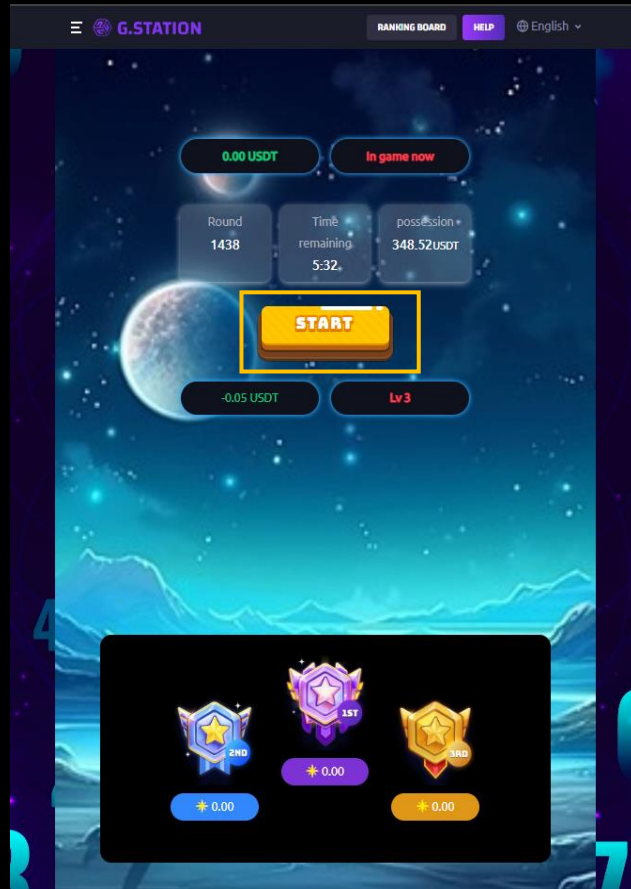

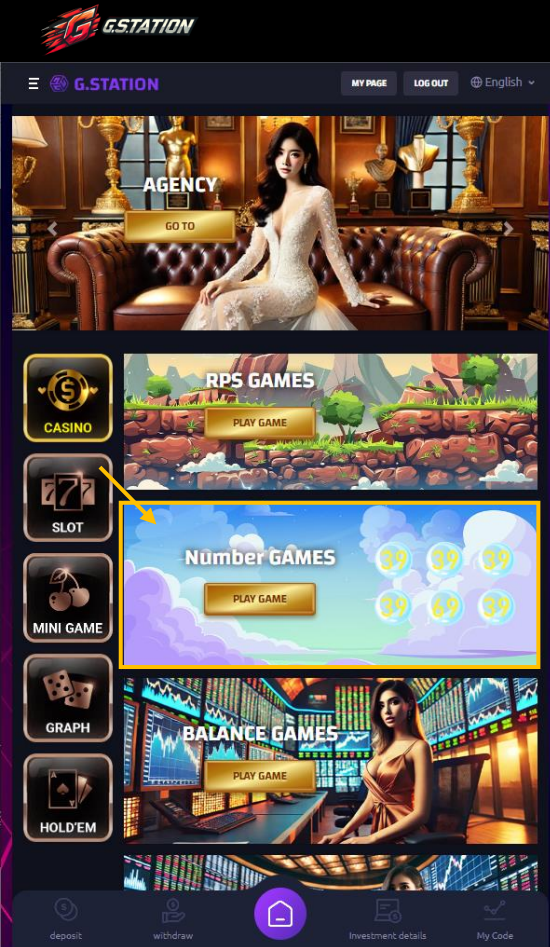

And when choosing **rps** games.
(**RPS GAMES**)

STEP 1: “PLAY GAME” and Click “start”

STEP 2: Then match it with the number at the top.

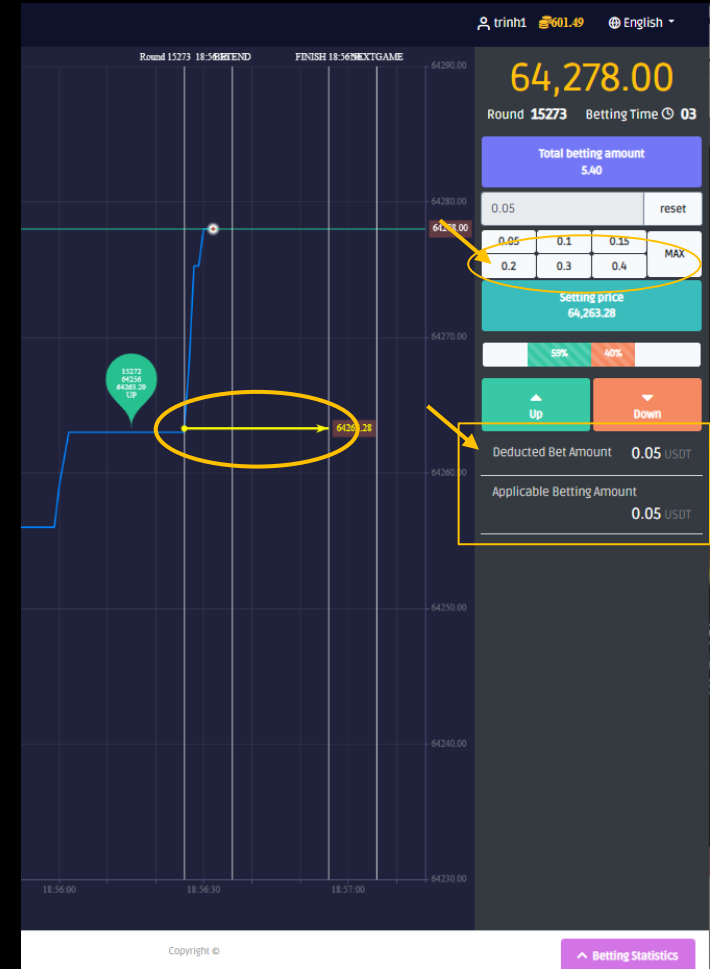

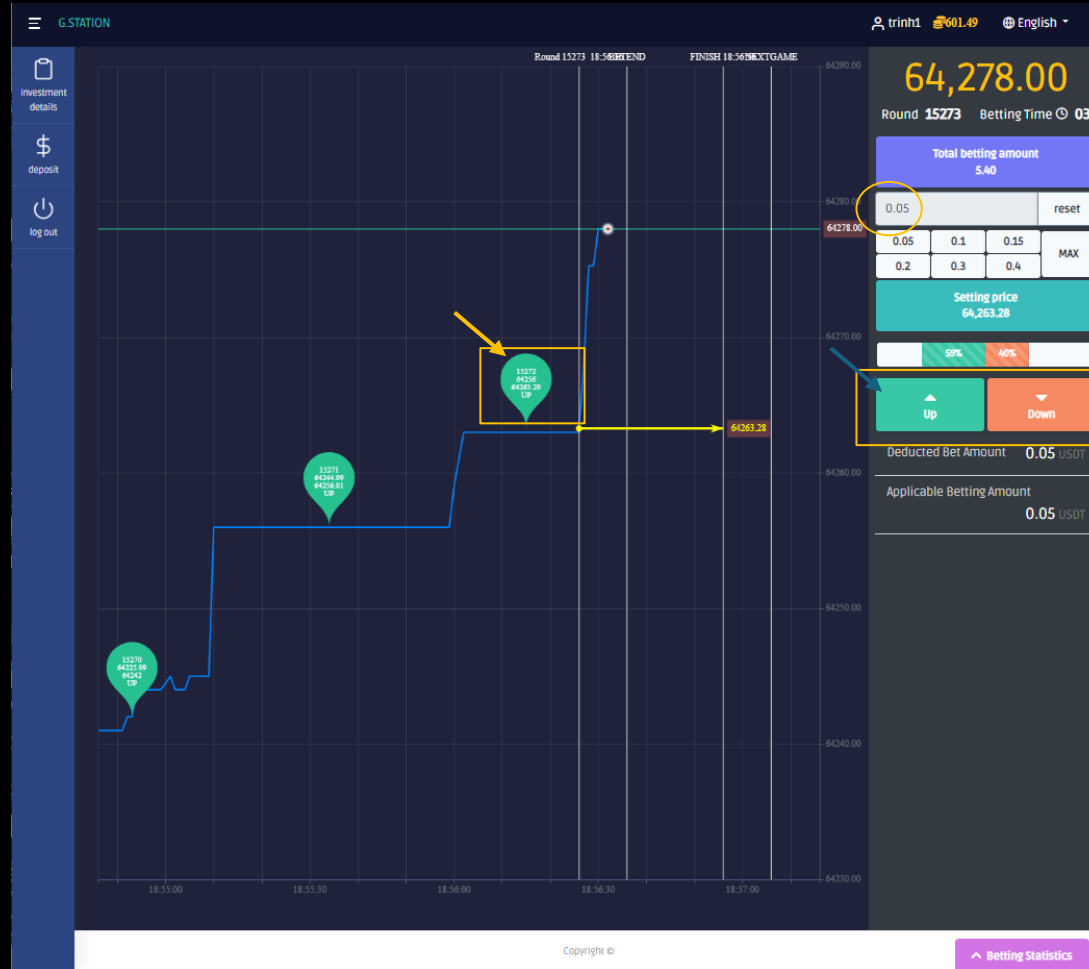

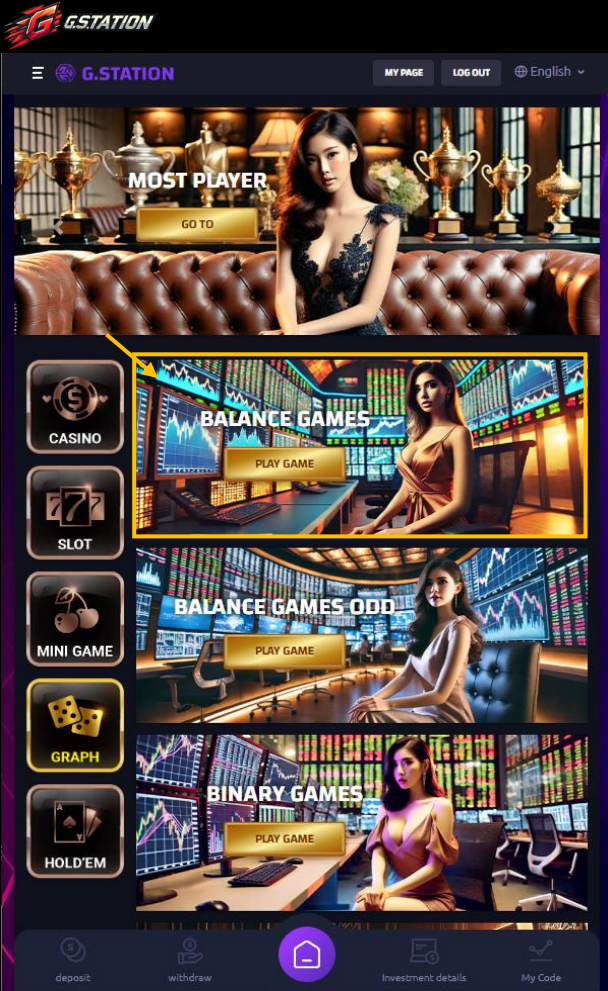

STEP 3: The more identical numbers match, the higher your rank. If the number of correct answers is the same, the prize money will be divided in half.

NEXT, WHEN YOU SELECT A NUMBER GAME (NUMBER GAMES)

STEP 1 : Start by clicking “PLAY GAME,” then click “START.”

STEP 2 : In the game, players must find different numbers as quickly as possible. The game offers three modes: **easy**, **medium**, and **hard**. Each level has a different difficulty, and as you select the target numbers, the system changes their positions to increase the game's difficulty.

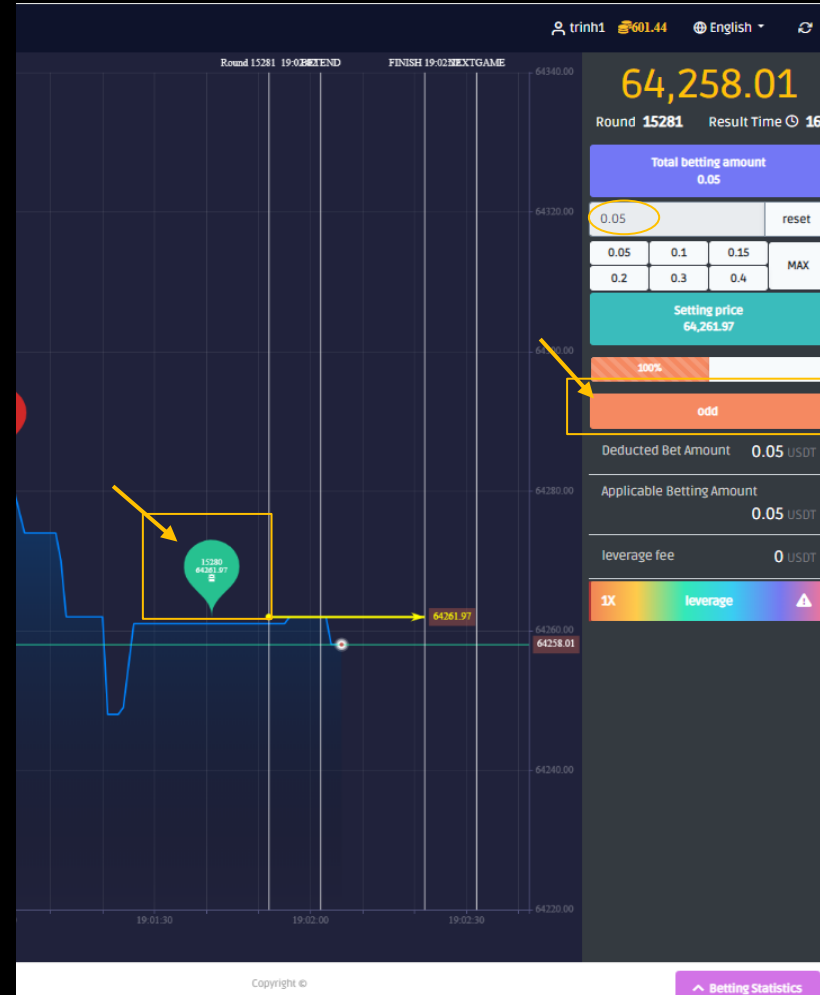

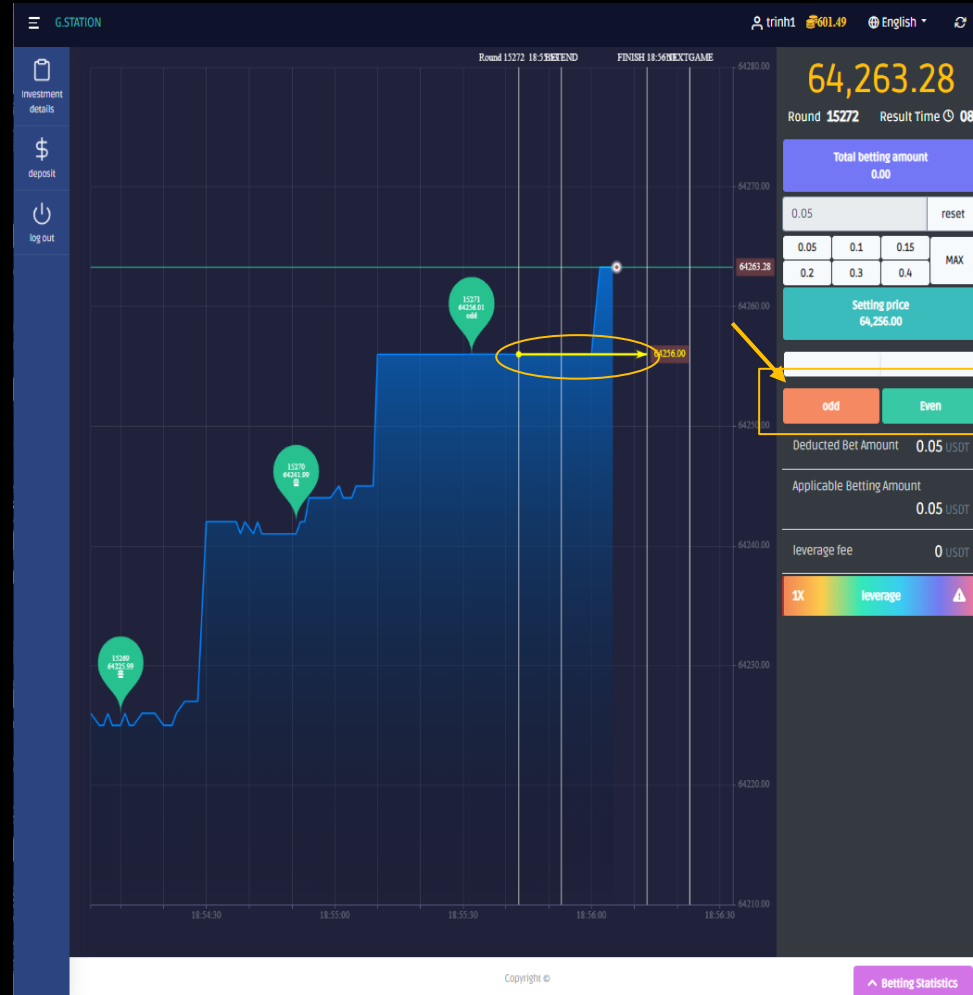

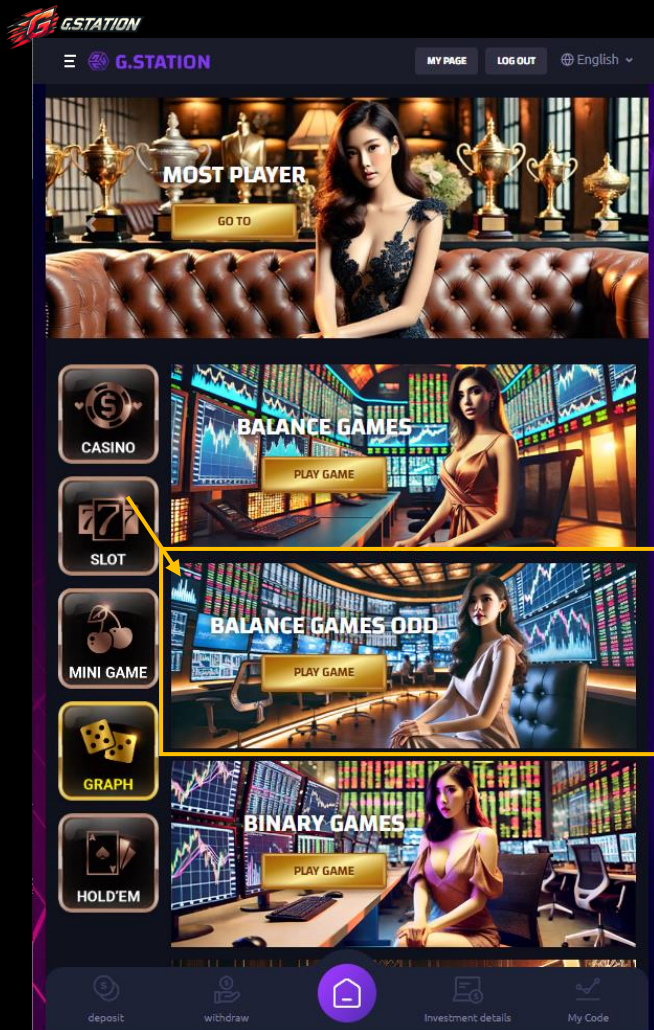

When choosing a balance game. (BALANCE GAMES)

STEP 1: “PLAY GAME” and Click “start”

STEP 2: Look at the graph and bet on whether it will go up or down within the betting time.

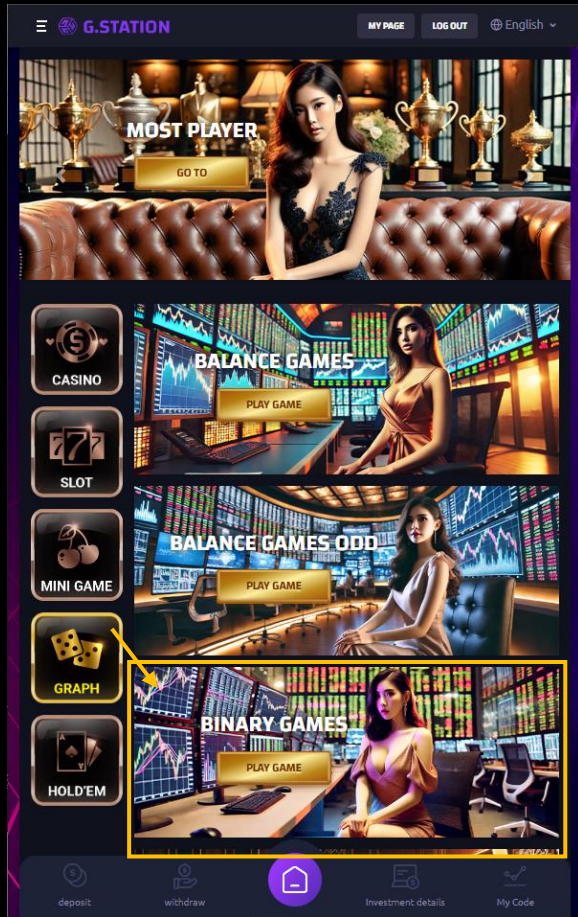

STEP 3: After a certain period of time, it is determined whether it is UP or DOWN, and WIN/LOST is determined based on the result. The LOST bet amount is distributed to the WIN group according to the betting percentage.

WHEN YOU CHOOSE BALANCE GAME (BALANCE GAMES ODD)

STEP 1: “PLAY GAME” and Click “start”

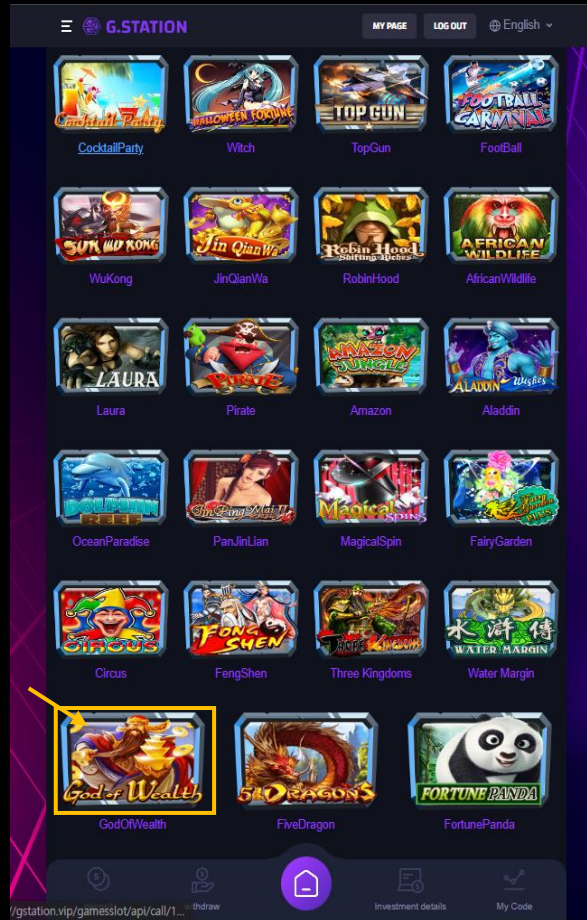

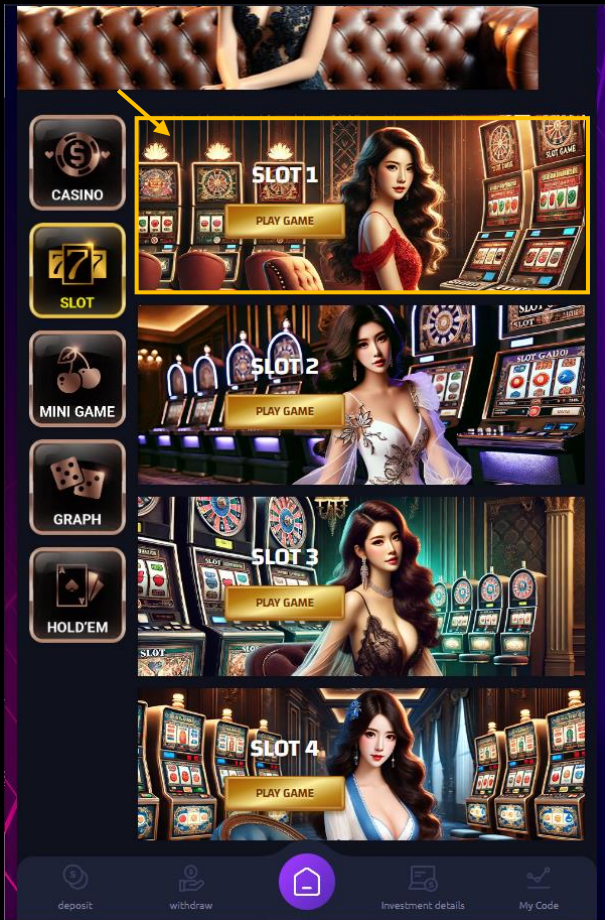

STEP 2: It is the same as the existing balance game, only the odd-even game has been added.

WHEN YOU SELECT A BINARY GAMES (BINARY GAMES)

STEP 1: Click "PLAY GAME" to start.

STEP 2: The game is the same as the existing balance ODD game. The last two digits of the number that appears at the top right can be ODD or EVEN, or ODD, ODD, or ODD, EVEN, or EVEN, ODD, or EVEN, EVEN. Matching the number in the last betting line with the final number on the graph increases the payout as determined.

Note: Most slot games follow the basic winning combination methods mentioned above, but each slot is designed with various bonus features, so the ways to win can differ. Like slot games 1, 2, 3, and 4, slot games have evolved into various genres and themes..

WHEN YOU SELECT A SLOT GAME (SLOT GAMES)

STEP 1: The game is very simple. Players need to press the 'Spin' button to start the rotation. Automatic betting is also available.

STEP 2: You win if 3 or more identical symbols overlap or are adjacent to each other on the slots, forming a combination. Additionally, adding more betting lines increases the chance of winning, allowing you to raise the betting amount.
